Subject: Comment in support of RIN 1210-AB30

April 27, 2010

It is high time to overcome the misguided idea that mental health is somehow different than physical health. The human organism is a complex one with many systems combining to make life possible. It makes no sense to exclude or diminish medical care for some of those systems! Make sure health care coverage for mental health is included in a single deductible.

Sincerely,

George Steinitz
