I am writing to protest any government action related to recent retirement funding legislation that the government has been trying to implement since 2010  
I like my freedom to make my own choices as to what I invest in through my self directed retirement funds.

I've been with broker invested groups like Merrill Lynch previously and all that got me was static value with high fees because of their trades that did not yield any growth.

That is why I switched to self directed retirement accounts.

The government should keep their hands off my money. I have saved and invested my whole life and certainly know better than the government how to take care of my money.  
The government has shown itself to be a completely inept, wasteful and corrupt entity so they have no credibility when telling Americans we are not capable of handling our own money. Here are a few examples of how the government has handled our money:

The Solindra investment by the government: This was a complete waste of \$530 million .

Social Security - If I had invested all the money I put into social security on my own, I would have far more money available to me in retirement than I will get. As it stands now, most of us will be lucky if we see any money and what we will get will pale in comparison to what we could have gotten if we could have put that money into savings instead of Social Security.

Theses are just two of hundreds of examples of why we, the American people, are better equipped to handle our own money than this government.

So stay the heck out of our retirement money.
