**To:** Talk to DOL

**Subject:** Pissing Contest

To whom it may concern:

I was sent an email from the Chamber of Commerce's head guy up there whom pretty much said the DOL was going to screw with the Retirement of millions of people. Personally I think there has been too much screwing of everyone just about everywhere. As far as leadership I have been able at times to contact the DOL with what I think has been a fair decision or outcome. But this is far different than creating policies. You all seem to be trying to fix some kind of money problem getting paid as a person up there at \$80 per hour to fix our problems rather than screw us because someone doesn't like what someone said or the "wording" is wrong. Really so this is a reason to drag it on waste time and money and to heck with those at the bottom because they will die off, and are happy with the little amount they make. Heck of a plan.

Why don't you be a little creative and do something like.

Rather than the people out here paying \$600 per month on insurance how about the US Gov. become the insurer with different plans or we will just leave it the way it is.

Build a Bridge from Alaska to USSR to reduce cost of transport. If we can build a damn island in the sea I am pretty sure we can build a bridge for a train.

Or what about solar panels on every semi to reduce the need for diesel fuel that has refueling units.

But oh no rather than looking at contracts who screw the US and the little people or doing a better job in controlling what is on the internet or what is "leaked" out. We would rather blame it on someone else and think of greed.

I do not want to get into a pissing contest between you or whoever simply because it's about the money and your name or whoever and truly not about the little people.

Every day I turn on the news it sickens me because of whoever is trying to screw someone else or someone got there feeling hurt over something that was said or race when we as mankind can either move forward and take care each

other or destroy each other. You tell me where another person can man reside in the universe and I'll kiss your ass.

I am tired of seeing what we have become babies in war dying and chopping heads off. The sick and the old. and the list goes on and on. We do not seem to understand compassion of our own today. Maybe this is because of the wonderful UN and a united globe world really then clean it the hell up and quit playing god based on your wealth.

Have a Great Day

Clifford Ferguson
