Dear Kathleen Sebelius, Secretary of Health & Human Services,

This is a good step in the right direction for our country's health. I only fear the long term side effects from taking birth control for too many many years of our Mother's, aunt's, sister's, and wife's lives, increasing the risks of mastectomies and hysterectomies, and other problems associated with having too much reproductive sex, such as vaginal erosion. I hope you will work the bugs out. Now if you bunch of mothers can just get routine infant male circumcision supressed, and replaced with accurate sexual health education, and stop teaching homophobia, then we can get back to natural forms of birth control.

Sincerely,

Frederick Rhodes
