Subject: HHS Mandate
Date: Thursday, August 04, 2011 1:03:58 AM

I completely disagree with the new HHS mandate requiring all insurance plans provide the full range of contraceptives as "preventative health services." The World Health Organization lists oral contraceptives with arsenic, asbestos and tobacco on its list of most dangerous substances that are classified as carcinogenic to humans. Furthermore, the mandate completely disregards the conscience rights of millions of Americans and tramples religious rights. I'm assuming this mandate is a thank you to Planned Parenthood for its support of certain election campaigns. I am against it on every level. This mandate is completely at odds with American freedom and democracy.
