General Comment

The only difference between fetal homicide and abortion is whether or not the mother wants the child. If a thug commits an act of violence against the child in a woman's womb and brings about its death, they can be tried and punished. If a doctor or drug commits an act of violence against the child in a woman's womb, with her permission, they get paid. Is this the standard of equal justice we want to promote? If a woman wants to get rid of her husband and commits an act of violence against him that results in his death, that's okay, but if someone commits an act of violence against a man and his wife wants him, its murder? What is the difference between that standard and the way we treat abortion/fetal homicide? Its a schizophrenic and unequal standard that is unconstitutional and should be ruled as such. The last thing we need to do is sanction it in our health care legislation.

Murder is murder. Take the sanction and funding of murder out of our health care. Not only that, but murder which is disproportionately carried out against African Americans is genocide, and African Americans have always accounted for a disproportionate share of abortions, just as Margaret Sanger intended. And yes, as a former Library Assistant, I do know how to look up those statistics in Government Docs. Stop the racist slaughter. Take the provision of abortion out of our health care.
