Organization: home school legal defense association

General Comment

There was reason for mass polio vaccines in the 1960's. But compulsory vaccines to prevent diseases caused by inappropriate behavior such as STD's should never be made compulsory. Vaccines themselves have potentially dangerous side effects, and should not be forced upon individuals. Those who choose to participate in potentially dangerous inappropriate behaviors should be responsible and personally pay for the vaccinations themselves, not asking the government to pay the expense with funds paid for by responsible citizens.
