Office of Regulations and Interpretations
US Department of Labor (DOL)
Room N-5655 200
Constitution Avenue NW
Washington, DC 20210

RE: Proposed Rule on Fiduciary Duties Regarding Proxy Voting and Shareholder Rights (RIN 1210-AB91)

We the undersigned, 6,755, concerned individuals oppose the Department of Labor's proposed rule, "Fiduciary Duties Regarding Proxy Voting and Shareholder Rights" (RIN 1210-AB91).

First, we wish to denounce the abbreviated time available for this comment period. A mere 30 days, instead of 90 days, serves only to suppress the participation of the public, investors, and other stakeholders in this review process.

We oppose the proposed rule because of the following:

• Fact: There are Not too Many Shareholder Resolutions

The DOL claims the rule is needed because of too many shareholder resolutions on environmental and social issues. In fact, on average, only 13 percent of Russell 3000 companies received a shareholder resolution in any single year between 2004 - 2017. This comes to one resolution every 7 years. It is absurd to consider this a burden. Moreover, resolutions play a key role in helping companies identify risks before they become major problems.

• Fact: Voting Shareholder Proxies is About Long-term Value

The rule's requirement that fiduciaries calculate the economic gain of every shareholder vote is, frankly, absurd. Resolutions support the long-term value of a company by encouraging sound governance and responsible operations. Trying to calculate economic benefit of each vote would be a poor use of retirement plan assets; one would hope the DOL would work to prevent such nonsense and poor use of retirement plan assets.

· Fact: Investors or their Fiduciaries Have the Right to Vote on Shareholder Resolutions

The DOL seeks to create a climate of fear about proxy voting, with the threat of regulatory investigation. This means fewer fiduciaries will vote, and more votes will follow management – rather than the best interests of investors and other stakeholders.

In closing, the DOL’s attack especially on social and environmental resolutions is irresponsible, dangerous, and out of step with commitments to sustainability that increasing numbers of companies and investors are making.

We therefore strongly recommend that this proposed rule be withdrawn.

Sincerely yours, (6,755 signatories)
