General Comment

I am furious that the federal government is presuming to tell me I am not allowed to make my own decisions regarding where I can invest my money. Our 401k plan administrator provides us with several fund options. We choose to invest in socially responsible funds because that is our priority. Our 401k administrator offers socially responsible funds because they know some of their customers want to invest in these funds. Your attempt to prioritize certain industries at the expense of others is unethical. If I wanted to invest in oil companies, I would have done that. You have no right force me to shore up an oil company with my retirement fund. You already do that enough with my taxes.
