General Comment

I have held many different careers in my lifetime, and all of the have afforded me the opportunity to be able to save financially for our retirements. My husband and I are grateful for the opportunities we have with our employers to be able to do so this year, especially during these uncertain times.

Because of our financial planning, my husband and I plan to spend the rest of our days in West Virginia where we can watch our grandchildren grow up. It is because of these careful decisions that we are able accomplish this dream. Most of these decisions were made because we placed our trust into the advisors who helped us with our 401(k) contributions and investments. We have trusted that the monthly contributions that we have made over the years would be invested to our best interests to ensure that we could meet our retirement goals. When we have placed our hard-earned money into our accounts, it was done so for only reason: to be used for our retirement.

These investments have been made for our future, and they have never been intended to be uses for political and social interests. My husband and I make our own personal decisions concerning what causes we support financially. I am writing today in support of this proposed rule that will help keep the monies that millions of people are investing toward their retirement futures will be used for one purpose only: to secure a great future.

I support this proposed Labor Department Rule, and I hope that you will take my voice and concern into consideration by implementing the proposed rule.
