**Subject:** Go Paperless - File Electronically???????

As a small business owner, this is the most ridiculous system I have ever seen. Why should I have to pay extra to file a return electronically? Electronic filing saves the government money. Why not have a web site where I can do the filing directly? All the software vendors listed on the web site seem to be selling packages for CPA firms (ie high priced). Until you provide direct for the end-user, free of charge filing, you should send a set of paper forms instead of making us ask for them.
