## General Comment

I am against any further compliance of the Best Interests of all our clients. As a Certified Financial Planner, we have a Code of Ethics that is a requirement to provide services for all my clients that are in their best interests. I sign this each year in order to keep my designation. As a CPA, I have another Code of Ethics that requires annual renewal of license and training to further my education as well as to always provide quality services.

I'm writing to express my concerns with the Department of Labor's (DOL) Retirement Security rule proposal. I believe this proposal will harm millions of low- and middle-income households by limiting access to personalized financial guidance and advice.

As a financial professional, I'm already required to act in the best interests of my clients under the SEC's Regulation Best Interest (Reg BI) and, when considering annuities, applicable state laws that impose similar requirements. Together, these regulations ensure that my clients and I can focus on working together to build responsible savings and investments habits.

This proposal has the potential to upend our existing, comprehensive structure by limiting our ability to help our clients safeguard their savings in a manner of their

choosing. In particular, the previous iteration of a substantially similar DOL rule resulted in a meaningful reduction in services offered to millions of low- and middle-income households. I am concerned that the resurrection of this rule is expected to exacerbate the racial wealth gap by roughly 20% due to a disproportionate impact on Black and Hispanic communities.

I hope the DOL will consider the harm the previous fiduciary rule had on communities, as well as the changes in securities regulations that came with the adoption of Reg BI and state insurance suitability rules and withdraw the Retirement Security rule proposal.
