Name: Patrick Alfano

General Comment

I believe in protecting our communities with the right to invest their hard earned savings in the manner that each individual should be able to choose how to invest and plan for their future. We as financial educators, advisors, and investment professionals, and you as legislators hold the responsibility to stop putting roadblocks between an individual and their goals. The paternal nature of increased regulation and processes has been proven to further confuse the individual investor in a manner that can lead to decision paralysis which is detrimental to reaching their goals. Please discard this new proposal for the benefit of all of your constituents.

I'm writing to express my concerns with the Department of Labor's (DOL) Retirement Security rule proposal. I believe this proposal will harm millions of low- and middle-income households by limiting access to personalized financial guidance and advice.

As a financial professional, I'm already required to act in the best interests of my clients under the SEC's Regulation Best Interest (Reg BI) and, when considering annuities, applicable state laws that impose similar requirements. Together, these regulations ensure that my clients and I can focus on working together to build responsible savings and investments habits.

This proposal has the potential to upend our existing, comprehensive structure by limiting our ability to help our clients safeguard their savings in a manner of their choosing. In particular, the previous iteration of a substantially similar DOL rule resulted in a meaningful reduction in services offered to millions of low- and middle-income households. I am concerned that the resurrection of this rule is expected to exacerbate the racial wealth gap by roughly 20% due to a disproportionate impact on Black and Hispanic communities.

I hope the DOL will consider the harm the previous fiduciary rule had on communities, as well as the changes in securities regulations that came with the adoption of Reg BI and state insurance suitability rules and withdraw the Retirement Security rule proposal.
