Subject: Pension Protection Act

Our daily newspaper, THE COLUMBUS DISPATCH, carried an article discussing the new bill signed by President Bush. I am heartily in favor of the government requiring employers to sign up employees for 401(k) plans. I am a self-employed consultant and have been planning for my retirement for 30 years. I have developed a savings plan that means I will be able to afford retirement, because I forced myself to save. Unfortunately the lack of planned pensions and our citizen's abysmal savings rate require drastic measures. The Pension Protection Act will hopefully force employees to realize they MUST save for their future security. Thank you.
