## General Comment

The government has no right to tell investment managers where to invest their clients' money. That decision is up to the client in consultation with the manager. Forcing investment managers to invest in certain areas of the economy violates the rights and freedom of such managers and their clients to invest their money. The proper purpose of government is to protect rights, not violate them. Stop violating rights! Protect the freedom of investment managers and their clients to make their own investment decisions with their retirement savings and all funds they possess.
