## General Comment

Federal Registrar John smith,

I'm counting on the Department of Labor to follow through with this revision and fix the Trump-era rules that protect unsustainable industries by making it more difficult for retirement plan managers to take into account the real world impact of their investments on the climate, working conditions, or racial equity, as well as the major economic risks associated with these investments.

Workers and their retirement plans should have the right to take the big picture into account regarding which companies they support and finance with their hard earned savings.

I really think Trump and his Administration wanted elderly and retired people to end up with no funds to survive on.

If he hadn't stolen funds from every fundraiser, even the one where \$6.Million was raised for Veterans only \$3.Million was accounted for. What a disgrace and it was never investigated fully.

There were hundreds of fundraisers, where did all that money end up?

Pensions, 401/ 501's and any savings plans your average or low income earner has should not be in jeopardy.

Carolyn L Haas
