## General Comment

The Biden administration is attempting to FORCE investment managers to invest MY MONEY in woke corporations rather than whats best for my financial future.

No American should be FORCED to suffer from having to delay their retirement or getting by on less money because an investment manager wanted to support woke corporations.

And no American should be FORCED to work their entire lives towards their retirement, only to have everything theyve saved be used to support companies who push environmental extremism, Critical Race Theory, and identity POLITICS.
