General Comment

Federal Registrar John smith,

Ownership of a business through investments should not be divorced from the conduct of the companies invested in. I only want to invest in companies whose behavior aligns with my ethical values. This includes environmental responsibility.

Workers' and retirees' savings should be able to be invested in safe and sustainable ways that promote healthy returns, a healthy economy, and a healthy society and planet. That means ensuring that the updated rules fully reverse the Trump-era rules by eliminating all prohibitions and burdens that discourage retirement plans from considering workplace safety, climate impact, racial equity and other conditions that affect the long-term sustainability of the business.
