General Comment

Dear DOL,

Please enact a new rule allowing Retirement Investment Managers to also consider the risks that Climate Change presents. Employees want their pension plans to reflect their values and many are worried about Climate Change for themselves and their families. I know the solutions to Climate Change will also help create good paying jobs which is also very important to employees.

This opportunity will help to further reduce green house gas emissions.

Please do the right thing and approve the new rule.

Thank you,

Richard L Russman
