

I recommend no exemptions or loop holes. I also recommend mandatory jail time for any corrupt, conflict of interest, or any wrong doing. We know from experience that white collar crime and criminals get special treatment and are protected by republican politicians. The supreme court has been bought by the fossil fuel industry and other corporate interests and recent decisions have overwhelmingly favored business while the American people continue to pay financial and social costs.

Wall street got bailed out during the housing theft crisis of 2008, and business got bailed out during the covid PPP farce. We know the target of the white collar criminals is hard working middle class americans retirement systems to include 401K's and IRA's. The corrupt politicians and their business interests were successful in ending the American worker pension system and forcing Americans to save in these risky funds, which are sitting duck targets for the Republican kleptocracy.
