General Comment

Under no circumstances should retirement funds be invested in ANY fossil fuel industries or infrastructure. Both for the protection of our environment and well being and for the sake of the investment itself -- FOSSIL FUELS ARE A HORRIBLE LONG TERM INVESTMENT!!! One way or another, they are going away. If we don't de-invest now, in the long term the investment will crash when the LITERAL BIOSPHERE collapses! Now is the time to make a choice, and it is a very, very easy one.
