

Office of Federal Contracts Compliance Programs
Methodology for Developing the Construction Scheduling List
FY 2023, Release – 1

The FY 2023 Construction Scheduling List Release 1 contains 250 federal and federally assisted construction contractors and subcontractors.

OFCCP developed this list by initially downloading federal construction contracts valued over \$10,000 from the USAspending database. Information for federally assisted construction contracts valued over \$10,000 was provided by the U.S. Department of Transportation. Contract records with estimated start dates prior to May 15, 2022 and estimated end dates after May 15, 2025 were retained.

OFCCP then cross-referenced its compliance management system and removed those contractors that were: (1) currently under review; (2) currently in a monitoring period pursuant to a conciliation agreement; or (3) currently within the exemption period following a closed review.

OFCCP further refined this list by selecting contractors with the highest aggregated contract value for all contract work performed in their assigned OFCCP district office's jurisdiction. The total number of contractors selected by region and district office was based on available staff measured in full-time equivalents. Regions can transfer cases across their district offices or to other regions to balance their workload when appropriate. OFCCP does not purge unscheduled cases from prior lists before releasing a new scheduling list. OFCCP's district offices will exhaust prior lists before selecting contractors from a newly released scheduling list.

DISCLAIMER: OFCCP's decision to publish its scheduling methodology is voluntary. OFCCP has no legal obligation to publish its methodology and will revisit the decision to publish its scheduling methodology each time the methodology is revised.
