

Worker Health Protection Program

Tiffany Martin

Outreach Coordinator

Worker Health Protection Program

Barry Commoner Center for Health and the Environment
Queens College, City University of New York

Worker Health Protection Program (WHPP)

Who we are

- DOE funded Former Worker Program since 1999, screening employees of 16 DOE sites
- Managed by Barry Commoner Center for Health and the Environment, Queens College, City University of New York (CUNY)
- Our partners: United Steel Workers (USW)

Dr. Steven Markowitz, MD, DrPH

- Principal Investigator & Project Director since 1998
- Chair of DOL Advisory Board on Toxic Substances and Worker Health

Jeanne Cisco

- Portsmouth Outreach Coordinator

Worker Health Protection Program (WHPP)

Portsmouth Site Screening

- Screenings may include: physical exam, chest x-ray with b-read, blood test, breathing test, beryllium test, urinalysis, and hearing test.
- Participants at the highest risk of lung cancer (based on age, work history, and smoking history) are invited to receive Low Dose CT Scans from the WHPP Early Lung Cancer Detection Program (ELCD).

Program Details:

- Open to former and current Portsmouth workers with at least 30 days in a non-building trade.
- Portsmouth participants are eligible for rescreen examinations every three years.
- Screenings are held at Adena Medical Center in Waverly, OH and Southern Ohio Medical Center for Occupational Medicine in Portsmouth, Ohio.

What we've done in Portsmouth, Ohio:

Former workers screened: PORS= 3,871

Exams (including re-screens): PORS= 8,833

Former workers screened for lung cancer: 2,285

Low-dose CT scans completed: 9,303
